

I am very surprised and disappointed to learn that the FCC is even thinking about allowing a commercial enterprise tell them what to do. Indiana has the best "Do Not Call" list in the nation. I feel that you are there to protect the public against this kind of harassment not to promote it so that some enterprise can make money off of the public. Do not forget, some of my U.S. Tax money pays for your budget and probably your salary. It would be a terrible for you to override Indiana's law. We don't need these idiots calling us all the time. Thank You
